

Containment Partitions

ASM Field Flexible Partitions are an exciting solution to the current need for separation screen and physical barriers needed for any office application. The system features 5 aluminum extrusion profiles and that are used with multi-wall polycarbonate to create custom hard partition in the field. The unique extrusion design holds the multi-wall panel in place without the need for screws or other fasteners. The partitions can attach to the floor, hung from the ceiling over head or be mounted to the top of desks and other furniture using the base plate or angle brackets.

Typical Extrusions

Capital U-Channel
Attaches to any side of the Multiwall panel to stiffen and terminate.

Base Plate
Attaches to the bottom of the Multiwall panel to attached to flat surfaces.

Additional Extrusions

Capital F-Channel
Ideal for ceiling hanging of partitions or mounting to other surfaces.

Capital H-Channel
Ties Multiwall panels to each other vertically or horizontally.

Corner Channel
Used to make 90° corners.

Key Performance Characteristics

- Cost effective site built partitions
- Professional high quality appearance with a high level of site customization
- Extrusions designed for press fit onto ASM supplied 8 mm multiwall panels
- Easily attached to furniture or floor
- Multiwall panels adhere to 2013 NFPA 75 and are UL Listed for use in aisle containment
